Ontario Oregon, 249 South Oregon 97914

Volume 13 Number 2 Hollandssewshoppe.com	Summer Sale! Boise 208-322-4211	August 2010 – November 2010 Ontario 541-889-9183
---	------------------------------------	---

The glorious summer may be coming to a close, but your sewing dream does not have to end. We've got hot new toys at the shop, so come and try the updated software, machines, and accessories for yourself.

We finally have Viking's latest addition to their embroidery line, the **Ruby**. It has a 10" arm, allowing for an embroidery field up to 360mmx200mm. It has a large high resolution touch screen with on screen customizing. Now you don't have to struggle to precisely join large embroideries, because it has Design Positioning! With approximately

1000 stitches including sewing fonts and an Exclusive Embroidery Advisor, you will be customizing projects in no time.

We also have the long-awaited **5D Embroidery Software**. It is faster and easier than ever, with the ability to load or create vector images to create designs. No more hours wasted cleaning up pixilated clipart. Scale vector art to any size without losing the image quality. Add dimension and depth with the new multicolor gradient feature. Not ready for 5D? We'll give you a great deal on selected 4D Software. Buy 4D Professional, 4D Embroidery, 4D Embroidery Extra, 4D Design Enhancer, 4D Family Portrait, or 4D Organizer at 30% off.

Would you like to get into quilting your own quilts or perhaps finishing other's quilts to make some extra cash? Husqvarna Viking now has the **QuiltSewClever**, an automated quilter

where you can press start and walk away. The QuiltSewClever complements the MegaQuilter 18x8 and the Quilt Design Creator Software. More advanced than the QBOT, it will allow for tremendous editing capabilities. Rotate, mirror, or scale on its large touch screen. Place oddly shaped blocks easily with Multi Point Pattern Placement, and stitch perfectly straight lines with Horizontal and Vertical Lock. You'll avoid purchasing extra hardware because the QuiltSewClever utilizes standard communication media. It has a USB drive and will even receive internet upgrades.

Perhaps there are previously introduced machines you have not seen yet. Own your own embroidery machine and software for an affordable price. The **H|Class 500E** comes with 100 built-in stitches and bonus software to create custom embroideries from clipart. Combine designs, rotate, resize, or add lettering from most TrueType Fonts from your computer. Then send the design directly from the computer to the machine via a USB cable.

Each month we have excellent sales planned, so please, stop for a visit. Take advantage on thread, stabilizer, and accessory specials. We'd love to help you with all your sewing needs.
